

Panel Product Range

The Complete Panel Solution

IMO's range of Panel products continues to deliver innovation and efficiency worldwide, and is where technology and engineering excellence come together.

IMO's Panel range has been specifically designed to meet the demanding needs of today's panel builders and engineers whose requirements can range from a simple DIN rail terminal through to a complete panel solution.

IMO's products allow panel builders globally to deliver significant advances through greater efficiency, reliability and performance, thereby increasing their competitive advantage and delivering the optimum panel solution.

When purchasing from IMO you can be confident that over 40 years experience servicing the Panel Builder market has gone into the design and development of the IMO range.

Listed in this brochure are just some of the most popular products from the IMO Panel range. If you can't find what you are looking for, please contact the IMO Sales Desk on +44 (0)1707 414444. We will be happy to assist you with your enquiry.

Value Added ASSEMBLY

IMO Value Added Assembly Division will help you to:

- Reduce your stock level
- Reduce cost
- Ensure quality
- Increase productivity

Are you looking for a supplier for your assemblies who can offer:

- Access to a wide range of products
- Extended range of DIN terminals and accessories
- Relay and sockets, MCBs, power supplies, timers, contactors, signal interface units.
- Standard or custom marker solutions for DIN terminals
- Flexible packing facilities for individual or volume packing

IMO through its Assembly Division can provide Value Added Assembly solutions built to customer specification whether you are looking for prototypes, one-off projects, or small to large volume requirements with regular deliveries, IMO can offer you a solution.

As a world recognised manufacturer of electrical components, IMO have a wide range of connection, power, control and interface products readily available from stock and are always looking forward to the next challenge.

Your assembly can be as simple as 2 DIN terminals on a small piece of rail, to multiple products on DIN rail lengths up to 2m; and if required IMO have a range of standard enclosures which are available to accommodate your units, or we can design a custom solution with you.

Challenge us and tell us about your assembly needs and see what solution we can propose.

To save time and money call us today with your drawings, photos and specifications.

Cam Switches

IMO's range of Cam Switches incorporates a unique building block system that allows for any number of switch variants to be built and supplied to the customer. Such is the flexibility of the Cam Switches, that they can be utilised in countless applications including mains/motor switching and control and instrumentation circuits.

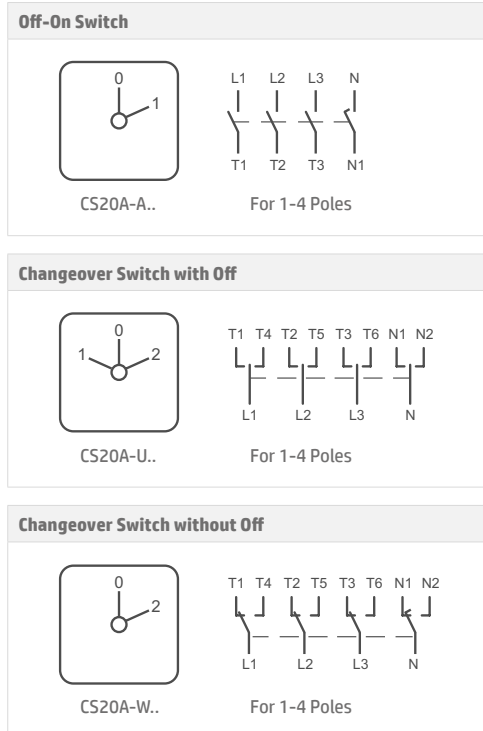

The standard contact rating is 20A, although higher ratings are available on request and these switches have double interruption per pole and two contacts per cell. Standard units incorporate a 22.5mm central fixing for panel mounting. The switch body and actuators are supplied separately to provide a choice of four different set up configurations. Connection from actuator to switch body is made through a solid aluminium shaft.

Manufactured in accordance with IEC 60947-3, the new Cam Switches carry an IP65 rating appropriately when mounted in a suitably rated enclosure and have 'finger proof' screw terminals. The switch body is supplied complete with legend plate and all units are UL/cUL approved.

Power Supplies

IMO's range of industrial Power Supplies have all been designed especially for the control and automation marketplace. Offering the benefits of slim lines, universal input, and the security of IMO's 3-year warranty, the three ranges of PSU provide multiple choices for low power electrical or electronic systems commonly used in automation applications.

All IMO Power Supplies are UL approved and offer high efficiency, making them an exceptionally reliable power source for components such as sensors, relays, contactors, timers, temperature controllers, PLCs, process controllers and HMIs, all of which are available from IMO.

- Single & Three Phase Versions
- Universal Input
- AC/DC Operation
- High Efficiency up to 93%
- Class 2 Types
- Up to 960W
- Plastic & Metal Enclosures
- Short Circuit Protection
- DIN Rail Mountable

IMO's comprehensive range of DIN Rail mountable Timers delivers up-to-the-minute technology. Ranging from the simple single-function through to the multi-function timer with display, these timers are being used daily in all types of applications and industries. The ultra compact design and top-mounted terminals make installation easy, even in the tightest of panels, providing customers with a solution at minimal cost. Wide input voltage capability allow these products to be installed in applications across the world.

IMO's range of Panel Mount / Plug-In Timers provide users with a range of settings and functionality and timing ranges between 0.1sec and 100hrs. Other key features include indication of time range, time up and power on timing. IMO Sockets are available to complement the panel mounting facility thereby giving the installer the option of DIN rail mounting, surface mounting or printed-circuit board mounting.

IMO Timers are always of the highest quality, and are backed with a Three Year Warranty. If you require a timer that is not listed here please contact IMO to receive information on the full range.

Istart Enclosed Starters

- Push button stop/start
- IP65 ABS enclosure
- Prewired to accept overload (U12/16E..)

Part Number	Description
DOL10110	DOL Starter 4kW 10A Start and Stop, 110VAC coil
DOL10230	DOL Starter 4kW 10A Start and Stop, 230VAC coil
DOL10400	DOL Starter 4kW 10A Start and Stop, 400VAC coil
DOL18110	DOL Starter 7.5kW 18A Start and Stop, 110VAC coil
DOL18230	DOL Starter 7.5kW 18A Start and Stop, 230VAC coil
DOL18400	DOL Starter 7.5kW 18A Start and Stop, 400VAC coil

Modular Heating & Lighting Contactors

- Suitable for Control of Lamps, Heating, Air-Conditioning & Motor Control
- 2 or 4 Pole Version
- 20A up to 63A 400V AC1
- Multiple Pole Configuration Available
- Space Saving Design
- Low Switching Noise
- Low Power Consumption
- Coil Voltage 230VAC or 24VAC

Part Number	Description
HC20-20230	20A 2 Pole N/O 230VAC coil
HC20-02230	20A 2 Pole N/C 230VAC coil
HC20-2024	20A 2 Pole N/O 24VAC coil
HC25-20230	25A 2 Pole N/O 230VAC coil
HC25-40230	25A 4 Pole N/O 230VAC coil

Part Number	Description
HC25-04230	25A 4 Pole N/C 230VAC coil
HC40-20230	40A 2 Pole N/O 230VAC coil
HC40-40230	40A 4 Pole N/O 230VAC coil

Contactors 4 - 400kW

- 10A up to 1200A 400V AC3
- Minimum Size & Maximum Performance
- AC & DC Operated
- Ambient Temperature -40°C to +90°C
- DIN Rail Mounting up to 115A AC3
- Bifurcated Aux. Contacts
- High Contact Reliability
- 4 Pole Full Rated Version Available
- Coil Connection Top & Bottom (MC10N to MC22N)

Micro Contactors (MA04, MA05)

Part Number	Description
MA04-S-22230AC	Micro Relay Cont 4P (2N/O+2N/C), 3A AC15, 230VAC coil
MA05-S-01110AC	Micro Cont 3P Open 2.2kW 5A AC3, 1N/C Aux. 110VAC coil
MA05-S-0124AC	Micro Cont 3P Open 2.2kW 5A AC3, 1N/C Aux. 24VAC coil

MA05-S-1024DC	Micro Cont 3P Open 2.2kW 5A AC3, 1N/O Aux. 24VDC coil
MA05-R-S-0124AC	Micro Rev Cont 3P Open 2.2kW 5A AC3, 1N/C Aux. 24VAC coil
MA05-P-0124AC	Micro Cont PCB 3P Open 2.2kW 5A AC3, 1N/C Aux. 24VAC coil

Miniature Contactors (MR07, MB09, MB12)

Part Number	Description
MR07-S-22230	Mini Relay 4P (2N/O+2N/C), 3A AC15, 230VAC coil
MB09-S-10=24	Mini Cont 3P Open 4kW 9A AC3, 1N/O Aux, 24VDC coil
MB09-S-1048	Mini Cont 3P Open 4kW 9A AC3, 1N/O Aux, 48VAC coil
MB09-S-10110	Mini Cont 3P Open 4kW 9A AC3, 1N/O Aux, 110VAC coil
MB09-S-01230	Mini Cont 3P Open 4kW 9A AC3, 1N/C Aux, 230VAC coil
MB09-S-10230	Mini Cont 3P Open 4kW 9A AC3, 1N/O Aux, 230VAC coil
MB09-P-10=24	Mini Cont 3P Open 4kW 9A AC3, 1N/C Aux, PCB mount, 24VDC coil
MB12-S-10=24	Mini Cont 3P Open 5.5kW 12A AC3, 1N/O Aux, 24VDC coil

Standard Contactors (MC10N - MC22N)

Part Number	Description
MC10N-S-1024DC	Contactors 3P Open 4kW 10A AC3, 1N/O Aux, 24VDC coil

AC Isolators

IMO offers a comprehensive range of high-quality AC Isolators with switching capabilities ranging from 20A to 125A, both in 3 and 4 Poles. Within the range, there are a number of different mounting types including Panel Mount, DIN Rail Mount and Enclosed, plus there are a range of handles and extendable shafts to suit most applications, as well as other accessories to compliment the range.

Enclosed - PE Series

- 3 to 8 Pole
- On-Load 20Amps to 125Amps
- Interlocked Enclosure Lid
- Padlocking Positions
- IP65 Enclosed Type
- Side Mounted Auxiliary Contacts
1 N/O + 1 N/C

DC Isolators

Solar Isolators “SI..” are switchgears for interrupting the DC/AC-Inverter from the solar-panels. Photovoltaic installations have to be equipped with DC-isolators in accordance to IEC 60364-7-712.

- TRUE DC Isolator to UL508i
- Available in 2,4,6,8 Pole Versions
- Max. Rated Current 58A @ 1000VDC (Acc. To DC21B for SI32)
- Max. Rated Current 80A @ 600VDC (Acc. To DC21B for SI55)
- High Reliability Self-Cleaning & Vibration Resistant Knife Contacts
- Arc Suppression Chamber
- Operator Independent High Speed Switching (Typically 3ms)
- Additional Security with Patented “Safelock” Function
- Compact & Space Saving Design
- Maximum Operator Torque of 1Nm for Easy Operation (SI16-32)
- Poles can be Wired in Series to Increase Rating (DC21B & DC22B)
- Large Box Terminals with up to 25mm² Cross Sectional Wiring Area
- Different Mounting Versions Available (DIN / Base / Panel)
- Solar Connectors are Available (Plug / Socket / Branch)

Motor Protection Circuit Breakers C4

IMO C4 Motor Protection Circuit Breakers are designed to be a compact reliable unit that offers high protection for 3 phase induction motors but can also be used as a motor starter, and for line protection. Integrating the functions of a circuit breaker and thermal overload relay in single unit so they significantly reduce the space requirements and wiring necessary for an installation that would have traditionally used a three component starter assembly.

With ratings from 0.16A to 100A in 3 frame sizes the IMO C4 has a short circuit breaking capacity of 100kA (Icu) and incorporates both thermal overload functionality and phase failure protection for phase-to-phase faults thereby offering comprehensive protection of the motor and controlling electrical circuitry.

The C4 is available with either rocker or rotary control and is complemented with a wide range of accessories that enable it to be connected to supplementary products, such as an IMO contactor, to give greater versatility. The design flexibility of the C4 ensures its convenience for installers, with the availability of auxiliary contacts that can be front or side mounted, to busbar systems available for the interconnection of up to 5 units; the C4 can be wired from either the top or bottom supply terminals without any reduction in ratings.

DIN rail and panel mount models are designed in accordance with IEC 60947-1, IEC 60947-2, IEC 60947-4-1, VDE 660 and UL approved (E223201) ensure that the IMO C4 circuit breakers are ideal for installation and OEM applications.

- Motor protection rating up to 100 Amps
- Short circuit breaking capacity up to 100kA
- Phase failure protection
- DIN rail mounting
- Wide range of accessories

DIN Rail Terminals

IMO's range of DIN Rail Terminals offers the customer a host of features at unbeatable prices. With high quality throughout the IMO range includes standard modular feed-through terminals, double and triple level terminals, fused terminals, disconnects and three-level sensor terminals just to highlight a few.

IMO DIN Rail Terminals can be offered with screw clamp, push-fit or out latest innovation - Spring Clamp Pluggable connections and although offered in beige as standard, the range is available in multiple colours throughout, allowing OEMs and installers to use colour code systems within their panels.

In line with the constant drive towards greater packing density of all components within the control panel, IMO has made its DIN Rail Terminals both lighter and more compact whilst their strength is ensured by using self-extinguishing unbreakable polyamide 6.6. IMO DIN Rail Terminals are offered in sizes from 2.5mm² through to 240mm² and have bevelled cable entry to simplify the introduction of the conductors.

Our terminals are designed to meet both national and international standards, and have gained approvals from organisations such as UL, CSA, DNV, VDE; and a number of products are also certified to IECEx.

Industrial Power Relays & Sockets

IMO's range of Relays include Signal Relays, Power Relays, Automotive Relays and Solar Relays, and range of compatible sockets. IMO's relay manufacturing goes back as far as 1970, and over the years we have strived to innovate and produce new types of relays for developing technologies. In 1984 we developed the first BT Type 47 Telecom Relay, and again in 1990 we launched the first BABT compliant isolation relay for data transfer, confirming our place as one of the leading global relay manufacturers.

As part of our innovative nature we have manufactured a range of Slimline DIN Rail Mount Relays at just 6mm wide, which provide substantial space savings in a panel when compared to traditional plug-in style relays. The range with plug-in relays rated at 6 Amps allows easy maintenance without the need for complete rewiring of the socket. The sockets are available in wide operating voltages for both AC and DC circuits within the same unit, providing greater flexibility for the user and reducing the number of stock items required.

DIN Rail Sockets for RSE Relays

Part Number	Description
SRRE8	Standard Socket for all 8 Pin RSE Relays
SRRE8-M	Common Wiring Terminal Socket for all 8 Pin RSE Relays
SRRE11	Standard Socket for all 11 Pin RSE Relays
SRRE11-M	Common Wiring Terminal Socket for all 11 Pin RSE Relays

Custom Cable Solutions

- Built to your specific requirements
- Supplied to you under a single part number
- Top quality, competitively priced solutions
- Can accommodate certified wiring or components (eg. UL, TUV etc.)

However simple or complex the cable solution you require, built entirely to your exact specification, prepared the way you want it, IMO is your supplier of choice!

We offer customers prepared cables, cable assemblies and cable looms, with or without crimps, terminations & housings, with no volume too high. We extrude and produce many common types of certified or non-certified equipment cable, in a selection of materials including PVC, Teflon™ and silicone.

Not Just For OEMs...

IMO's bespoke cabling service is not just for OEMs. The cable solutions we manufacture can be used across a multitude of industrial applications, including but not limited to:-

- **Mobility** - Stair Lifts, Patient Handling
- **Security** - Alarm Systems, Fire Systems, Access Systems
- **H.V.A.C.** - Control Panels, Heating Controls, Air Con Equipment
- **Industrial** - PAT Testing, Lift Manufacturing, Boiler Manufacturing
- **Catering** - Food Processing & Packaging, Vending Machines
- **White Goods** - Shower Manufacturing, Refrigeration Manufacturing

No tooling investment

No more crimping and assembling

No more managing inventory of wires and terminations

Huge time and cost savings for you and your company

Whether you need a complex assembly or simple terminated wire, we can work from a drawing, a formal design or a sample to start the process.

Component Solutions for EV Charging

MCBs

Miniature Circuit Breakers protect from over-current and short circuit situations to safeguard assets from risk of damage from overheating and fire.

In accordance with IEC 60898-1.

RCBOs

Residual Current Circuit Breakers with Overcurrent Protection combine the functions of an MCB and RCD to provide all-round protection in a compact package.

In accordance with IEC 60898-1.

RCDs

Residual Current Devices protect personnel from contact with live or damaged wires and components by disconnecting power when an earth leakage current is detected. Standard AC and Type B available.

Branch Isolators

Of modular design, IMO branch isolators are robust and offer power isolation, mounted on a DIN rail.

AC/DC Isolators

IMOs AC & DC Isolators offer robust, lockable power isolation for safe and controlled maintenance and repair activities.

IMO Isolators carry UL safety approvals.

Contactors

IMO's range of Modular Contactors offer control and switching of charging current flow. High reliability for faultless switching.

Full range of accessories and options available including PCB mounting.

Power Supplies

IMO's range of UL approved modular power supplies offer high efficiency, universal input and IMO's 3 year warranty.

For use by EV Installers and EV Charging Manufacturers

As a world leader in the solar industry with many global OEMs using our DC switching and isolation technology, IMO is pleased to introduce its EV Protect range specifically designed to meet the requirements of the Electric Vehicle market.

No matter whether you are an EV Installer looking for a simple one-stop solution for a domestic installation, or an EV Charging Manufacturer looking to source components to make your offering more competitive, IMO has the EV Charging components for you.

A dedicated EV Charging brochure can be found on our website.
